

**REAL ADVICE**

**FOR REAL  
CHALLENGES**

## **Growth Oriented**

Innovators should not be held back by the academic musings of lawyers in ivory towers. The in-house legal perspective, combined with real technical experience, uniquely positions Forstai Cyber Kinetics as a true partner for our clients' growth.

## **Flexibility + Experience**

Get the experience and skills you expect from a Fortune 100 in-house lawyer with the flexibility of a small firm.

## **EXPERIENCED PROFESSIONAL**

Matti Neustadt is an international legal advisor in digital law, bridging U.S. and European expertise in privacy, cybersecurity, data protection, governance, AI, and IP.

Her strength is translating complex legal and technical requirements into actionable strategies capable of growing with the business. With a BSc in Applied Physics, she transitioned to law after nearly a decade of working in semiconductors. Recognized in Silicon Valley's Top 100 Women of Influence and Innovator of the Year for in-house legal practice, she holds CISSP and Fellow of Information Privacy certifications.

## **WHAT WE DO**

Practical legal advice designed for growth and delivered with a sense of humor.

### **ACTIONABLE LEGAL ADVICE**

Laws impacting technology are complex and frequently changing. Get practical advice designed to keep moving business forward.

### **SCALING FOR TRANSFORMATION**

One size doesn't fit all. Get legal or operational advice designed to work with where you are now and move prepare you for the next phase of business and technology growth.

**SCALABLE**

**LEGAL  
ADVICE**

## LEGAL SERVICES

Plain language, straightforward legal advice on digital legal compliance. Let us help you understand and build scalable legal compliance programs relating to cybersecurity, data protection, responsible AI, and privacy. Get advice and drafting help with contract provisions, statutory notices and disclosures, incident investigation and handling, transparency requirements, and data transfers.

## OPERATIONS AND CONSULTING

Practical quantitative risk-based strategic guidance for prioritizing and implementing data operations to meet “reasonableness” standards under data protection and privacy law. Unbiased guidance on automation systems from a lawyer with both engineering, incident command, and operations experience.
